SUMMARY

IT professional with experience supporting mission-critical systems in the banking sector and strong troubleshooting and problem-solving skills. Combining Linux systems administration, task automation (Python, PHP, scripting), and an analytical mindset, I provide efficient user support and contribute to continuous process improvement. Familiar with technical documentation, incident management, and agile methodologies. Currently pursuing a Computer Science degree, bringing systems-level thinking and the ability to build internal tools that streamline the team's day-to-day work.

PROFESSIONAL EXPERIENCE

Banco do Brasil

Jun 2025 – Present

IT Intern / Software Developer (Support & Backend)

- **Troubleshooting & System Support:** Rapid diagnosis of production incidents, IT support for end users, and collaboration with cross-functional teams to deploy patches with minimal impact on end users.
- **Database & Infrastructure Management:** Administration and optimization of MySQL databases on Linux servers. Execution of complex SQL scripts to ensure data integrity and generate management reports.
- **Time-Tracking API Development (PHP + Electron):** Designed and developed a PHP API that communicated with a desktop application built in Electron, ensuring synchronization and accuracy in time measurement. This experience reinforced my ability to build internal tools and integrate systems.
- **Documentation & Continuous Improvement:** Authored technical documentation and procedure manuals, contributing to standardization and faster incident resolution.

Additional Experience

Jun 2024 – Apr 2025

Technical Lead & Full Stack Developer

- **Market Intelligence Automation:** Built Python web scraping scripts to extract and structure data for price trend analysis – demonstrating the ability to develop tools that add business value.
- **Mobile Application Development with Flutter:** Designed and built a cross-platform mobile app using Flutter, integrated with a local SQLite database for offline data storage and synchronization. The solution met the project's mobility needs, complementing the web/desktop platform and delivering a consistent experience to end users.
- **User-Driven Product Discovery (Innovation Project):** Led interviews with end users to identify pain points and opportunities, turning feedback into new features. Strong communication skills across different stakeholder profiles with a focus on user experience.
- **Agile Management & Documentation:** Implemented the full Scrum lifecycle, ensuring predictable deliveries and maintaining comprehensive technical documentation (system manuals, API specifications).

RELEVANT PROJECTS

Pc Hunter

Python, Streamlit, AI (LLM)

- Hybrid scraping pipeline combining regex and LLM to collect hardware listings, with a live Streamlit dashboard for price monitoring and resale opportunity detection.

Antibiotics Manual

Dart, Flutter

- Flutter mobile app for fast, offline-first lookup of antibiotic protocols, built with clean architecture and a clinical-grade UI.

ImobData

Python, Playwright, Machine Learning, PostgreSQL

- Real estate data extraction pipeline built with Playwright, integrated with Machine Learning models for price prediction and comparison, featuring interactive dashboards for tracking market trends and predicted values.

News Search

Python, Supabase, NLP, BS4, OpenRouter

- Automated news pipeline that scrapes, deduplicates, and runs sentiment analysis to gauge market impact on target companies.

EDUCATION

Universidade Positivo

Bachelor's Degree in Computer Science

Expected: 2027 (In Progress)

SKILLS

Languages: Python, Java, C#, SQL, TypeScript, Dart, PHP, C/C++.

Frameworks & Libraries: FastAPI, Flask, Spring Boot, Flutter, React, Pandas, Scikit-Learn, Playwright, REST APIs.

Tools & Infrastructure: Git, Docker, Linux, PostgreSQL, MySQL, AWS.

Practices & Methodologies: Scrum, Agile, Clean Architecture, RPA, Open Source.

LANGUAGES

Portuguese (*Native*)

English (*Advanced*): Fluent technical reading, professional writing and conversation.
